SKILLS

Frontend
HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Vite, Tailwind CSS, responsive design

Backend
Java 17, Spring Boot 3, Spring Security, Spring Data JPA, RESTful API, JWT, FastAPI

Databases
PostgreSQL, MySQL

AI integration
OpenAI / Groq LLM APIs

DevOps & Cloud
Git, GitHub Actions, Docker, Docker Compose, Vercel, AWS S3

Tools & process
Postman, IntelliJ IDEA, Jira (Scrum), AI-assisted coding with manual review

EDUCATION

B.Sc. in Software Engineering
FPT University, Ho Chi Minh City
2022 – 2026

LANGUAGES

English — working proficiency
Vietnamese — native

PROFILE

Final-year Software Engineering student at FPT University. I build responsive websites and full-stack web apps with React and Java Spring Boot, integrate REST APIs, and deploy them myself with Docker and Vercel. I shipped a live AI fitness platform and lead a 4-person team on an e-government system.

EXPERIENCE

Technical Lead — Nghĩa Hành Số
09/2026 – Present

Capstone project, built for real use by a commune government · E-government reporting system · MVP in development

- Lead a team (frontend, backend, AI) building a system where residents submit complaints via a Zalo Mini App and officials process and track them.
- MVP running on Zalo: commune news feed, an AI assistant for administrative procedures, and a 3-step feedback form with area picker and map.
- Defined the architecture, requirements and business flows; run the project in Jira Scrum on a 3-phase, 3-month plan.

Instructor — MindX Technology School
09/2023 – Present

- Teach Python fundamentals and basic web programming.

PROJECTS

Viway — AI Fitness & Nutrition Platform
2025 – Present

Full-stack Developer · Personal project · Live demo · Source

- Built the React frontend (user app and admin dashboard) on a Spring Boot REST API with JWT authentication.
- Enforced per-user ownership checks so users can only read and change their own plans and logs.
- Designed a 40+ table PostgreSQL schema with Flyway migrations; production runs with schema validation.
- Integrated a FastAPI + Groq LLM service for personalized workout and meal plans, with per-user AI credits.
- Deployed with Docker Compose to a public domain; GitHub Actions CI and Sentry error monitoring.

Landing Templates — 3 Responsive Websites
2026

Frontend Developer · Personal project · Source

- Built 3 responsive, config-driven landing pages (real estate, interior design, education), prerendered at build time for fast loads and SEO.

Tech: React 19, TypeScript, Vite, Tailwind CSS v4, Framer Motion

English Learning Platform
2025 – 2026

Backend Developer · Academic team project · Source

- Built 100+ REST endpoints for a Student / Teacher / Admin platform: lessons, classes, assignments, tests and progress.
- Integrated Azure Speech (pronunciation scoring), AWS Transcribe (video transcripts) and OpenAI (AI conversation).
